

MERITOR® SELF-ALIGNING CENTER BEARINGS

MERITOR®

IDEAS DRIVING RESULTS

INDUSTRY-LEADING DESIGN FOR
SUPERIOR PERFORMANCE.

Instead of just replacing your center bearings, why not install a better idea? Meritor's industry-leading center bearing design assures optimum alignment to the driveshaft under all operating conditions. The Meritor Self-Aligning Center Bearing provides better bottom line results and is ideal for the most popular heavy-duty truck and tractor applications.

Features And Benefits

- Rubber cushion pivots in the bracket, allowing +/-5 degrees of driveline angularity
- Reduced risk of premature bearing wear due to misalignment
- Provides a common mounting platform on the crossmember or mounting bracket. No shimming or bracket changes are necessary to achieve desired alignment
- Genuine OE replacement product
- Unique design protects the bearing against contamination without the use of external deflectors
- Backward compatibility with previous Meritor or current competitive designs
- Meritor self-aligning center bearings should not be replaced with traditional, non-self-aligning center bearings due to possible angularity issues

Internal deflectors feature silver base – external deflectors no longer required

Solid or slotted rubber cushion available

Driveline Series	Cushion Type	Bearing Diameter	Height	Mounting Holes (Center To Center)	Competitive Part Number	Meritor Part Number
176N, 17N (Heavy Duty), 18N, 85WB, 92N	Slotted	2.36"	3.38"	8.62"	210661-1X	CB210661-1XSA
